

# EMANUEL WERTMAN

## SOFTWARE DEVELOPER

---

Morris County School of Technology | emanuel.wertman@gmail.com | (973) 945-9385

---

Motivated high school computer science student with experience in Python, C++, Java, and Linux, seeking an internship to apply and expand skills in software development and cybersecurity. Interested in building practical projects, solving real-world problems, and contributing to a collaborative engineering environment.

### EDUCATION

---

#### Morris County Vocational School of Technology

Class of 2027

- Academy for Computer and Information Sciences
- 4.25/4.3 GPA
- Dual enrollment with Fairleigh Dickinson University for Computer Programming

### TECHNICAL SKILLS

---

**Languages:** Python, C++, Java, C, Rust, SQL

**Tools:** Git, Linux, Postgres, Wireshark, Claude Code, AWS

**Concepts:** OOP, Data Structures, Web Exploitation, Forensics,

**Interests:** Cybersecurity, Computer Architecture, Machine Learning

### PROJECTS

---

#### Venatio - NASA App Development Challenge

*Backend Developer*

- Developed backend systems for an app tracking NASA's Artemis II mission, focusing on mathematical modeling and data processing
- Implemented calculations to support mission-related data visualization and functionality
- Collaborated in a team environment to build a functional, user-facing application

#### MNIST Digit Recognizer

*Machine Learning Project*

- Built a handwritten digit recognition model in Python without external ML frameworks
- Implemented core machine learning logic manually, including data processing and model training
- Trained and tested the model on the MNIST dataset to classify digits 0–9 (96% accuracy)
- Strengthened understanding of underlying ML concepts by avoiding high-level libraries

### ACHIEVEMENTS

- 
- NASA App Development Challenge Finalist
  - Certificate of Special Congressional Recognition
  - Empower Hacks 3.0 Winner
  - NJ TSA Engineering Design 1<sup>st</sup> Place

### EXPERIENCE

---

#### PureAir (Nonprofit)

Sept 2024 - Aug 2025

*Lead Web Developer*

- Lead development of a responsive educational website on vaping and smoking impacts, collaborating with nonprofit leadership to translate goals into a scalable platform
- Built for accessibility and cross-platform compatibility to maximize outreach across schools and libraries

#### Teddy Bear Clinic (Nonprofit)

Nov 2025 - Feb 2026

*Fullstack Developer*

- Developing an interactive website to reduce healthcare-related anxiety for 250+ children through approachable, user-focused design
- Implementing key features including program pages, events, donations, and chapter onboarding to support expansion and engagement
